## **FOR FEDERAL ORDER MARKETS BY STATE AND COUNTY**

U.S. DEPARTMENT OF AGRICULTURE  
Consumer and Marketing Service  
Dairy Division

C&MS-50

September 1966

## PREFACE

This publication presents information relating to milk supply areas for handlers regulated under Federal milk marketing orders, which are authorized by the Agricultural Marketing Agreement Act of 1937.

In contrast to the marketing areas where the regulated handlers distribute milk to the public, and which are specifically defined by the Federal orders, the milk supply areas are not specified by the orders.

Table 1 shows the annual volume of milk delivered to Federal order plants by State of origin, and the percentage that such deliveries are of all milk sold to plants and dealers within each State.

Table 2 lists the Federal milk marketing areas in alphabetical order and shows the number of producers and the volume of milk delivered to each market from each State.

Table 3 is for use in conjunction with table 2. It lists the States by geographic location (as in table 1) and shows for each county in the State the total number of milk producers serving Federal order areas, as well as the total for each market. While the geographic order of the States makes it possible to show the data for most markets on the same or consecutive pages, the data for some markets are several pages apart.

\* \* \* \* \*

The sources of milk for each Federal order market by State and county were reported for 1963 in AMS-243 (1964), "Sources of Milk for Federal Order Markets by State and County," issued in November 1964.

September 1966

## HIGHLIGHTS

During 1965, handlers subject to Federal milk marketing orders received milk from more than 150,000 producers in 45 States. The volume of milk from these producers accounted for nearly one-half of the milk sold to plants and dealers in the United States. Federal order plants were the recipients of all deliveries from producers in New Mexico and Connecticut; in five States--Montana, Oregon, South Carolina, Alaska, and Hawaii--no producers delivered milk to handlers operating under Federal orders.

The primary sources of milk for most Federal order markets were the State or States in which the marketing area was located. In December 1965, 50 markets received more than 90 percent of their milk from the one or more States included wholly or in part in the marketing area definition. In all but four markets, the percentage was above 50 percent. The exceptions were: Chicago, with 82 percent of its supply from Wisconsin; Connecticut, which received 53 percent of its producer milk from farms in Massachusetts and New York; Massachusetts-Rhode Island, with 79 percent of its producer deliveries from farms outside of Massachusetts and Rhode Island; and Minneapolis-St. Paul, with 53 percent of its producer milk from Wisconsin.

In 11 markets, handlers received all of their producer milk from dairy farmers in only one State. For 21 markets, two States were the sources of their producer milk. Delaware Valley, Eastern Colorado, Massachusetts-Rhode Island and New York-New Jersey plants, on the other hand, obtained their milk supply from producers located in seven States. Milk was received from dairy farmers in six States by handlers under the Central Arkansas, Memphis, and Nebraska-Western Iowa orders.

Producers in Ohio, Missouri, and Wisconsin delivered milk to handlers under 11 different Federal orders. Most of the Ohio producers shipped milk to markets in Ohio. Nearly three-fourths of the Wisconsin producers supplied milk to handlers under orders having marketing areas in other States.

Producers in every county in six States--Connecticut, Delaware, New Hampshire, Rhode Island, Vermont, and Wisconsin--supplied milk to Federal order plants. In 19 States, producers supplying Federal order markets were located in three-fourths of the counties; and in nine other States, over one-half of the counties were represented. In only 12 States were fewer than one-third of the counties represented.

Federal order handlers received milk from producers in 1,867 of the 3,096 counties in 50 States. Of the 1,867 counties, producers in 665 counties supplied milk to more than one Federal order market. Producers in 447 counties delivered milk to two markets, and the number that supplied milk to three, four, and five order markets were 138, 53, and 21 respectively. Auglaize and Logan counties in Ohio, and Adams, Elkhart, and Jay counties in Indiana each supplied six markets. Seven markets received milk from producers in Mercer County, Ohio.
